# PhoneidoS-DI ®

Speech Enabled Radiology Reporting

PhoneidoS-DI (Dictation Interface) is software which simplifies the radiologists' job of producing reports.

PhoneidoS-DI provides proven enhancements in radiology reporting performance, both in terms of accuracy and speed, resulting in faster delivery of vital reports and better efficiency. **More than 4,690 workstations installed.**

Main Features

To achieve such results, **PhoneidoS-DI** has been implemented with the following advanced and exclusive features;

- Interactive dictation modality management;
- Personalized dictionary management, active users;
- Text formatting (underline, bold, italic, size etc.);
- Voice selection of text to delete or to correct;
- Synchronized audio playback: highlights words as they're being read back for editing or correction;
- Deferred dictation management allows an assistant to correct a report while listing to its sound recording;
- Correction through a list of alternative words: Allows for substitution of words by selecting it in the Correction Window;
- Speech-enabled insertion of text macros-frequently used element such as negatives can be easily saved and recalled by a single key word;
- "What-Can-I-Say" is the context sensitive help command;
- A more extensive on-line help system is also available;
- Phonetic user profile adaptation;
- Textural user profile adaptation with off-line addition of new words;
- Centralized network management of all user profile;
- Snap-shot on demand and system log for remote maintenance;
- Statistics on system use;
- Automatic punctuation configuration;

Specifications

- **Data Entry by Voice**

In Interactive modality where the Radiologist corrects the report when dictated . . .

or

In Deferred modality where an assistant corrects any errors later.

- **Entry by Macros**

Where the Radiologist uses "short cut" commands to add predefined text to reports.

Minimum Requirements

- PC Pentium IV Faster is Better!
- RAM - 256 MB More RAM is Better!
- Sound System
1. Microphone
2. Speakers/headset Operating System
- Windows XP Pro
- Windows 2000 Pro

Available Dealer Services

- Pre and Post Sale Consulting
- Integration with your RIS or PACS
- Installation
- On-site or Web Based Training
- On-site or Web Based Support
- Telephone Help Desk
- Upgrades
- Customization of Vocabulary from your existing reports
- Creation of Custom Text Macros
